1. INTRODUCTION

This plan is a practical guide to disaster preparedness and response for Pa Enua.

During a disaster daily life can be disrupted in many ways, including telecommunication and power outages, disruption to basic services, damage to roads and infrastructure, and displacement from homes. Disaster preparedness and response is a collective effort and includes households, community groups, churches, civil society, island councils, government agencies and emergency services.

Emergency Management Cook Islands (EMCI) is the national coordinating agency for disasters. EMCI works with many agencies and groups to coordinate response activities. **Disaster Risk Management (DRM) Committees** in the Puna and Pa Enua play an important role in the Cook Islands. They work at a local level helping to coordinate response activities, share information, and support their communities.

2. OBJECTIVES OF THE PLAN

The objectives of this plan is;

- 1) Provide a management and operational structure for mitigation, prevention, preparedness, response and recovery to any hazard in the area.
- 2) Provide clear roles and responsibilities of all key stakeholders within the Puna before and during a national emergency or disaster
- 3) To ensure residents are prepared to respond effectively to the threats of any Hazards
- 4) To ensure that all resources required for the implementation of this plan are provided, maintained and readily available.
- 5) To ensure that the safety shelters are readily available and managed for use in the event of an evacuation of residents within the area.

3. HAZARDS

Cyclones are the most well-known hazard in the Cook Islands however other hazards range from disease outbreak to fire as highlighted in the list and the basics of this plan can be applied to all hazards. These are only some of the listed hazards

Hazards	Level of Threat
Tropical cyclone & wind storms	High
Drought	High
Floods	High
Epidemic	High
Pandemic (Global)	High
Fires	High
Tsunami	Medium
Land slides	Medium
Aviation and maritime disaster	Low

Industrial accidents	Low
Armed conflict or terrorism	Low

4. AITUTAKI PROFILE

AITUTAKI is a coral atoll consisting of three islets (motus) situated at the corners of a Aitutaki lies 277 kilometers northeast of Rarotonga. It is a low volcanic island situated on a "near atoll" and has a total land area of 18.1km².

The encircling reef is over 40 kilometers long and is studded with 15 additional islets (motu). Aitutaki rises to about 121 meters above sea level at its highest point Maungapu. Aside from the latter hill, the island consists of flat-topped terraces and fertile planting areas and fairly extensive areas of coral.

The lagoon is 66 sq km and has an average depth of about 5 meters. There is no deep-water passage into the lagoon. Preservation of the beauty of the lagoon is a high priority as the tourism industry grows. Areas of the lagoon are now under "Raui" (a traditional conservation method) where marine activities are not permitted for given periods. This is to assist the re-establishment of the native clam population as well as reef fish.

The islets are also breeding grounds for the lorikeet.

Refer to Aitutaki Islands Profile for more information - http://www.emci.gov.ck/?page id=90

Population (2020 Geoportal Household Survey).

TOTAL	Males	Females	Ages 0-24 years	Ages 25-59 years	Ages 60+
1903	960	943	770	809	324

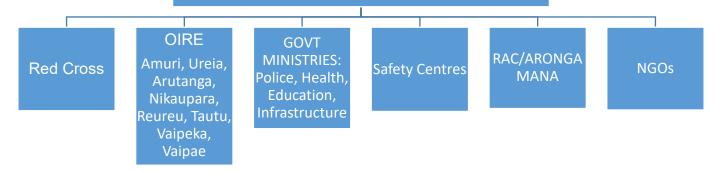

5. DISASTER RISK MANAGEMENT COMMITTEE

AITUTAKI DRM COMMITTEE

Island Council – Chair (mayor)

Disaster Coordinator: Mayor

Executive Officer, Police, Vodafone, Health, Red Cross, NGO etc.

8. ROLES & RESPONIBILITIES

a. PA ENUA DRM COMMITTEE

The DRM Committee shall:

- 1) Ensure the DRM Plan is kept current or at least be reviewed every two years
- 2) Disseminate information of prevention, mitigation, preparedness and response to the village as required
- 3) Maintain on-going communication and association with EMCI during peace time and during a national emergency or a disaster
- 4) Determine priority, responsibility and roles of each Emergency Services Agencies in the area during preparedness and response if required
- 5) Provide regular situation reports to EMCI during an event as required

- 6) Report directly to the National Emergency Operational Centre (NEOC) once a State of Emergency or a State of Disaster is declared.
- 7) Provide regular situation reports to the NEOC during an event

b. PA ENUA DRM COORDINATOR

The Disaster Coordinator shall;

- 1) Chair the DRM Committee
- 2) Take leadership in coordinating and managing all activities from prevention, mitigation, preparedness to response in the area
- 3) Maintain on-going communication and association with the Director (EMCI) during peace time and during a national emergency or a disaster
- 4) Report directly to the National Emergency Operational Centre (NEOC) once a State of Emergency or a State of Disaster is declared.
- 5) Ensure regular situation reports (or damage assessment(s) are posted to EMCI or the NEOC as required

c. TAPERE DRM COORDINATOR

- 1) Assist the Pa Enua DRM Coordinator and committee during the event
- 2) Report directly to the Pa Enua DRM Coordinator and committee
- 3) Take leadership in coordinating and managing all activities from prevention, mitigation, preparedness to response in the village as required

d. GOVERNMENT MINSITRIES AND AGENCIES

ROLES	RESPONSIBILITIES FOR - ALL HAZARDS
MAYOR	
MAYOR	Preparedness Coordinate the inspection of their respective village(s) and determine appropriate prevention, mitigation and preparedness activities to be carried out throughout the year. Provide advice to DRMC of activities carried out throughout the year, and during a disaster advise the Disaster Coordinator and MANGAIA EOC of available resources for possible deployment if necessary. Manage the EOC Maintain a population count of each village by household. Distribute disaster information and assistance to village community. Response Work closely with the DRMC concerning all disaster management related activities Recovery Same as above HAZARD – Bush Fires HAZARD – Drought Coordinate the operations according to the DRM Plan
EXECUTIVE OFFICER	

All Island Admin Employees to assemble at the office of the Island Administration/Secretary during a disaster for briefing Supervisors are to ensure each employee under his/her responsibility must be made aware of the requirements A head count if required for those present must be carried out by Supervisors The directives of the Executive Officer on behalf of the EOC/MCG be exercised to avoid any confusion The provision of assistances or any requirements from the EOC/MCG will be dispersed by the Executive Officer and must be attended unless under difficult circumstance Executive Officer is to direct the movement of Personnel, however, Supervisors may at time be responsible for this task Effective communication must be maintained effectively during this period All sectors must make it possible to provide assistance/s at any time, and the Administration must be able to provide stand/by resources to carry-out necessary works and needs The Executive Officer may at times delegate the authority to a senior officer for the disposals of his duties when he is not available During all clear, an assessment team should be dispatched to carry out survey, refer to annex Damage Assessment. Report(s) and log(s) are to be handed to the Executive Officer to compile and submit to EOC/MCG (if the EOC/MCG is no longer operational, the report(s) and log(s) should be submitted to the Disaster Coordinator). 101/11/2 / 12/11/11	ISLAND ADMIN	Preparedness

- 2025
tration Officer/Finance Officer must ensure proper edures are set and abided for all Documents, computers, etc. computers, assets etc. be transferred to Energy office or egs for safe keeping during a disaster. Eure nothing of whatsoever is discharged separately from as of other employees from other division must be sought transfer of all assets from the Admin. The ge of all assets, documents, computers etc. must be a staffs are to report to work when required during a
resources
duty in or near an event may exercise the following sed any road, footpath or open space otherwise is to the Area; roon or vehicle from entering or passing through the on on any road or footpath or in any other open space or any road or footpath or any open space within the Area leave the Area by the safest and shortest route; aster, the Police shall provide administrative and out as directed by the Disaster Controller or in his polacement.
ent staff and equipment available to adequately provide istance at either the Health facility or at the evacuation hich require medical assistance (and as directed by ntroller and EOC). there is a designated medical staff for each Safety C with regular situation reports on the number and extent a during the disaster. The after the disaster, provide an assessment of casualties to Disaster Controller.
s duri ⁄ afteı

Aitutaki Island Disaster Risk	Management Plan 2023 - 2025
	Attend to all casualties admitted to hospital
	Advise Rarotonga Hospital
	Recovery
	Report to Rarotonga Hospital and re-stock if required.
INFRASTRUCTURE	
	Preparedness
	 Building and Infrastructure staff must ensure Government properties are secured
	Mechanical & Heavy Plant Divisions are to ensure machineries are
	available when required by the EOC/MCG and other Divisions during a
	disaster. An inspection Team must be organized to ensure access
	(roads) are made clear to all residential areas including that to the School compound and those residents beyond the populated
	residential area.
	Water works Division must ensure the water system is accessed freely
	to those Centers providing shelter to the community
	Disposing areas (rubbish, toilets,) must thoroughly be checked to avoid
	contamination and ensure hygiene level is maintained
	Response
	 All employees must report to the Island Administration Office when advised by Executive Officer.
	Working Teams allocated to assist community and EOC/MCG must
	abide with instructions directed to them (by The Executive Officer or
INFRACTRUCTURE	respective Supervisors) and report back when necessary what been
INFRASTRUCTURE	carried out and what to be done next.
	 Supervisors are required to ensure the information are of genuine nature.
	Any urgent needs must be reported to the Executive Officer or the
	Supervisor on site and must be attended without delay, unless this
	cannot be done so for lack of materials or the work required is too
	dangerous in such circumstances but still remains to be done so later
	 Provide transport requirements as maybe directed by the Executive Officer on behalf of the EOC/MCG.
	Work party moves to severely damaged areas and conduct temporary
	remedial works (however, the safety of the work-party should not be
	compromised, should the work-party "on-site" supervisor deem an area
	unsafe despite directives from the EOC/ACG).
	Supervisors are required to ensure all employees report back to the
	Island Admin Office before dismissing each time their service is no
	longer required.
	Recovery
	Carry out all recovery action plans as directed by the EO.
	,
PUBLIC UTILITY	
PUBLIC UTILITY	Preparedness

- Senior Operator and operators must ensure diesel fuel, oil and the necessary spare parts are available and stored to ensure the continuous supply of electricity during a disaster
- must ensure to check all electrical connections, light, outlet sockets electrical equipment, appliance whether fixed or portable and other necessary electrical installation before any person/persons are evacuated into safety centers to ensure the safe use of these product are safe for the community
- electricity is to be disconnected under such circumstances where it is health hazard and threatening both life and property

Response

- Energy staffs must report to the Island Administration Office during a disaster
- Visual inspections must be maintained during a short periodic intervals to ensure all Pillar Boxes are safe from any damages, and the same as to the Over-Head/aerial lines
- Electricity to damaged building must be disconnected and either restored temporary if required or permanently isolate for safety reasons, and must be reported to both the owner and the Executive Officer who Acts as the Acting Officer In Charge
- Ensure, the public does not interfere with any electrical connection, or lines at anytime
- Necessary precautions must be undertaken to ensure, safety to life, property and equipment's are prioritized at all times
- Maintain power supply to essential areas where required
- Compile a report to the Office of the Executive Officer after a disaster

Recovery

 Restore all power lines and all required services as per assessment and as directed by the EO.

VODAFONE COOK ISLANDS

Preparedness

- Ensure an efficient communication link is established village to village, island to Rarotonga (if variables do not permit established communication with Rarotonga, an alternate island should be selected).
- Upon notification of a Hurricane Alert for the island, Install Telephone and Internet is to be set-up and made operational. Contact is to be made with National Emergency Operating Centre in Rarotonga.

VODAFONE COOK ISLANDS

Response

- SATLITE PHONE is made available to EOC incase of break down communications
- In the event that wind speed exceeds 45 mph steady or 65 mph gusting, the antenna should be driven to stow position by driving up in elevation to zenith (stowed). This will be done after advising Rarotonga Vodafone, Disaster Controller and EOC of impending stow or of any faults that may occur. Return to operating position once wind speeds have decreased below 45 mph steady. Separate instructions for Vodafone Cook Islands in Rarotonga will issue the "Stow" procedures.

Aitutaki Island Disaster Risk	Management Plan 2023 - 2025
	 Maintain contact with Rarotonga Radio on 3162 KHz until the satellite earth station antenna has been restored to the normal operating position and communications with Rarotonga via the satellite has been re-established. Action all requests for communications from EOC. Establish Internet, telephone emergency calling facilities if required. Provide a damage assessment of communication system to Disaster Controller (if necessary) Recovery Ensure facilities and equipment are safe and restored immediately if required
AGRICULTURE	
AGRICULTURE	 Preparedness Ensure a contingency plan is in place. Refer to Ministry plans. Advise growers on best crops to plant for the right season Response After a disaster, staffs be able to carry-out inspections of the Islands agricultural activities assess damage to crops if any Reports must be compiled and submitted to the Office of the Executive Officer after the disaster. Recovery Assist the island with advice on re-planting etc The type of fast food crops for an early recovery and food security
SOCIAL WELFARE	
(Disability & Elderly) SOCIAL WELFARE	 Preparedness Advise families of disabilities of best practices of keeping safe during the cyclone seasons. Provide a list of all the elderly and disabilities on the island All the homes of these elderly and disabilities to be plotted on the map Response Evacuate disabilities to centers if there is a need. Recovery Resettle disabilities into their homes once assessment is completed
MARINE	
MARINE	 Preparedness List of fisherman on the island with motor boats Identify and marine hazards Response Marine Officer is to combine with the Infrastructure workforce and may take active roles within the Supervision of part of the workforce when directed After a disaster, may be required to submit a report to the Executive Officer (dependable) Be available for any sea search if required

Aitutaki Island Disaster Ri	sk Management Plan 2023 - 2025
	Recovery
	Assist with the recovery as required by the EO
EDUCATION	
EDUCATION	 Preparedness: Ensure the Teachers Disaster Risk Management Resource kit is being taught in the classroom as part of their preparedness program in school Ensure all equipment are stored and secured Response: If no instruction is received from the Ministry of Education in Rarotonga, the principal to seek advice of the Mayor to close the school Ensure all students are safe Provide a report to the EOC of any concerns Recovery:
	Provide a detailed report of any damage to the school
RED CROSS	
	 Preparedness: Ensure first aid training is conducted on a regular basis (this activity may only be undertaken pending funding resources). Check pre-positioned stock are in good condition Advise Disaster Coordinator and EOC/MCG of available supplies Response team are updated & trained before the cyclone season Ensure satellite phone is working & charged
RED CROSS	 Response: When all clear is given carry out rapid overview assessment followed by household needs assessment Distribute relief items Send in Situation Report to island EOC. Recovery: Re-visit beneficiaries to see if more help needed. Assist in other areas as directed by the EO. If funds available assist Island Government with recovery efforts.

e. NON-GOVERNMENTAL ORGANISATIONS

VILLAGE LEADERS	
	Preparedness Work closely with the Mayor and the DRMC concerning all disaster management related activities
	Response:
PUNA LEADERS	 Assist the Mayor and the DRMC in coordinating the operation in their villages during an event
	 Report to the Mayor and the DRMC of any damages in the village during an event.
	Recovery:
	Assist with the recovery as required

Altutaki Island Disaster Risk	Management Plan 2023 - 2025
UNIFORMED ORGANISATION BOYS SCOUTS BOYS BRIGADE	ALL HAZARDS
GIRL GUIDES GIRLS BRIGADE YOUTH	 work thereby availing PIA work party to other jobs. Assist with search and rescue (if required under direction from Disaster Controller). Attend to other requests forthcoming from Disaster Controller.

9. PA ENUA EMERGENCY OPERATIONS CENTRE

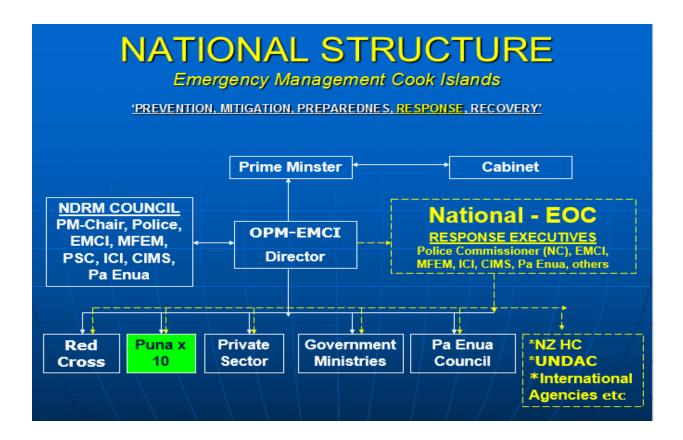

The Aitutaki Emergency Operations Centre (EOC) is the hub for the DRM Committee to coordinate local Pa Enua operations and communicate from during an emergency. The EOC will be activated when advised by EMCI. The DRM Committee will directly report to the National Emergency Operation Centre (NEOC) and provide situation reports.

Skilled staff will be required within the EOC to perform these task;

- 1.1. Telephone communicator (s)
- 2.2. Radio Operator (s)
- 3.3. Log keeper (s)
- 3.4 Logistics

Location of EOC	Contact	Number	Notes
TE MANA UIRA O ARAURA	Disaster	31007	
	Coordinator	75955	tekura.bishop@cookislands.gov.ck
	Mayor

		54911	
		31 015	
	Police	79 885	kauariki.henry@police.gov.ck
		53 023	

10. NATIONAL DRM STRUCTURE

11. NATIONAL EMERGENCY OPERATION CENTRE (NEOC)

The NEOC is the National Emergency Operation Centre and this is normally activated when a National State of Emergency or Disaster is declared.

Ministry/agency	Landline	Mobile
Emergency Management Cook Islands (EMCI)	29 609 - 29 601	54 005
National Emergency Operation Center (NEOC)	22 261 - 22 262 - 22 263	
Police Headquarters – Rarotonga	22 499 – 999	
MET Office – Rarotonga	20 603 – 25920	
Office of the Prime Minister	23 900 - 25 494	

ACTIVATING A STATE OF EMERGENCY

The DRM Act 2007 Section 20. A State of Emergency exists when -

- (a) Declared by the Prime Minster on recommendation from the Director;
- (b) The Director, in exceptional circumstances, determines that an immediate, coordinated, multiagency response is required to deal with an emergency event.

ACTIVATING A STATE OF DISASTER

The DRM Act 2007 Sec.19. In the event of a Disaster, the Prime Minister may declare a State of Disaster to exist in the whole or any part of the Cook Islands and such Declaration shall have immediate effect.

14. SITUATION REPORT

A situation report is to be provided following an Initial Damage Assessment of the situation. It provides an overview of what has happened. The EOC should include important information about their area, this might include:

- Name of the national event/incident
- Time of the national event/incident
- Number of injured, missing, or dead
- State of damage buildings, roads, power outages, debris (provide an overview)
- Name of safety shelters opened and number of evacuees
- Any pressing needs, for example, water, medical assistance etc.

A situation report is to be provided to the NEOC to activate a quick response to the event.

15. INITIAL DAMAGE ASSESSMENT

An Initial Damage Assessment is to be carried out by each Puna and to be forwarded to the NEOC.

a. IMMEDIATE SITAUATION OVERVIEW (ISO)

This assessment is to be carried out by the Puna assisted by the government agencies within the first 8 –12 hours or immediately after a disaster and provides general overview;

- Loss of lives or displacement of people?
- Damage to properties and infrastructure (roads, airport etc)
- Water, food and shelter

b. INITIAL DAMAGE ASSESSMENT (IDA)

Ideally the IDA is carried out within the first 48 hours after a disaster by response agencies. It provides further information about the level and extent of damage in each sector. The IDA information is used to determine;

- priority needs
- assistance required
- a preliminary estimate of the cost of damages in the country (food, water, shelter, housing, clothing, access, etc.)

c. DETAILED SECTOR ASSESSMENT (DSA)

Follow-up assessments by technical (TA) experts that provide detailed sector-specific information for purposes of planning and funding of recovery, reconstruction and rehabilitation in each sector.

16. SAFETY SHELTERS

Safety shelters are public buildings for the community to shelter in during an emergency – most commonly in a cyclone. Some people may need to stay in a shelter even after the threat has passed if there is damage to their home. The DRM Committee is responsible for the safety shelter and should appoint a shelter coordinator. The shelter is activated on the direction of the National Emergency Operations Centre. The Ministry of Health will provide a health professional to each activated shelter. Evacuees should be encouraged to provide their own bedding and food, personal medication and any other emergency supplies. Tourists may take refuge in the shelters, but tourist operators are responsible for caring and feeding tourists (as far as possible).

Primary shelters are the first option for use, however if they are not safe or available, secondary shelters should be used. Primary shelters have been rated better for location, structure, and facilities available.

PRIMARY SHELTERS	CONTACT	PHONE	NOTES

DISABILITIES AND ELDERLY

During a disaster some people need extra support. The following is a list of people identified as elderly or disabled who need to be supported and catered for during a national emergency or disaster. FILL IN BOXES BELOW

Name	Address
Updated list from Household Survey	
29 May 2019	List to be Annexed to
	DRM Plan
16 Nov 2022	List to be Annexed to
	DRM Plan

ANNEX 1: CYCLONES

In the event of a potential cyclone, Cook Islands Metrological Services (CIMS) will share a special weather bulletin via radio, CITV, telephones, mobile, emails and our coconut wireless. If it is serious CIMS, Police, and EMCI will discuss the situation and may consult with other stakeholders before making a decision concerning a national response. All response agencies including the Puna DRM Coordinators will then be contacted if they are required to act.

a. PREPAREDNESS & AWARENESS

1) Awareness Program

EMCI will be running awareness adverts on CITV, radio and print media. This will include radio talk back and awareness program in schools and the villages with the assistance of the village DRM Committee. Any awareness notices issued by EMCI will be displayed at areas within the village best suited by the village DRM Committee.

2) Private Dwelling Preparation

Local residence and business owners are fully responsible for taking care and preparing their homes/ premises and yards well in advance of the threat from a tropical cyclone or any known hazard.

3) Tree Trimming Program

The Chairman of the DRM Committee may designate members from within the DRM Committee to lead village volunteers to identify and trim trees that pose a threat to homes, other structures, utilities (Power lines) and roads. However some work is best left to

professionals to carry out to avoid any damage to properties and public utilities. All this work to be carried out way before the cyclone season starts in November and not when a cyclone is approaching.

4) Check Roofing Ties

Local residence and business are encouraged to check their roofs and tie them down as required. It is recommended that the bottom, middle and top row of the roofing be screwed down for extra strength however due to cost of screws extra nailing is sufficient.

5) Emergency Supplies

All families are encouraged to have an emergency supply and this means having your own food, water and other supplies in sufficient quantity to last for at least 72 hours. Storing non-perishable food such as can food instead of frozen goods is highly recommended in case of power cut. Top up spare gas bottles for cooking, water tanks for your water supply, hurricane or similar type lamps for lighting.

6) Emergency Kit

- Radio, Flashlight, Extra batteries, Cell phone with charger, candles, matches
- First aid kit, Medications and Medical supplies (hearing aids with extra batteries, glasses, contact lenses, syringes, etc.)
- Copies of personal documents (medication list and pertinent medical information, proof of address, deed/lease to home, passports, birth certificates, insurance policies)
- Baby supplies (bottles, formula, baby food, diapers)
- Sanitation and personal hygiene items.

b. CYCLONE RESPONSE PHASE GUIDELINES

PHASE 1 - CYCLONE ADVISORY (BLUE ALERT – 24 HOURS)

- 1. All schools will be advised to be closed.
- 2. DRM Committee members are to secure their own home and family first before reporting to the EOC for duty.
- 3. Follow up on neighbours and households within your responsible area. Check on the disabled and elderly.
- 4. Report to EOC for duty including a brief report to the Coordinator of the task carried out.

PHASE 2 - STANDBY (YELLOW ALERT - 12 HOURS)

- 1. EOC is activated
- 2. All ministries and business will be advised to close all activities
- 3. Safety shelters in areas which are likely to be affected are activated
- 4. Evacuate coastline or disaster prone areas with assistance of Police if ordered by the National Controller
- 5. Any person who refuse to be evacuated will be removed by force by Police or run the risk of being arrested

PHASE 3 - WARNING (RED ALERT – 6 HOURS)

- 1. Final public warning issued by all sirens being activated
- 2. Any business, public activities must cease operating immediately
- 3. Carry out a final check of area of responsibility
- 4. All emergency response agencies & personnel are placed on standby to begin operations if called upon
- 5. NO person must endanger their life or the life of others by placing themselves in a vulnerable situation without approval of the coordinator.

PHASE 4 - STAND DOWN - (GREEEN ALERT)

1. Damage assessments will be undertaken to help determine appropriate response.

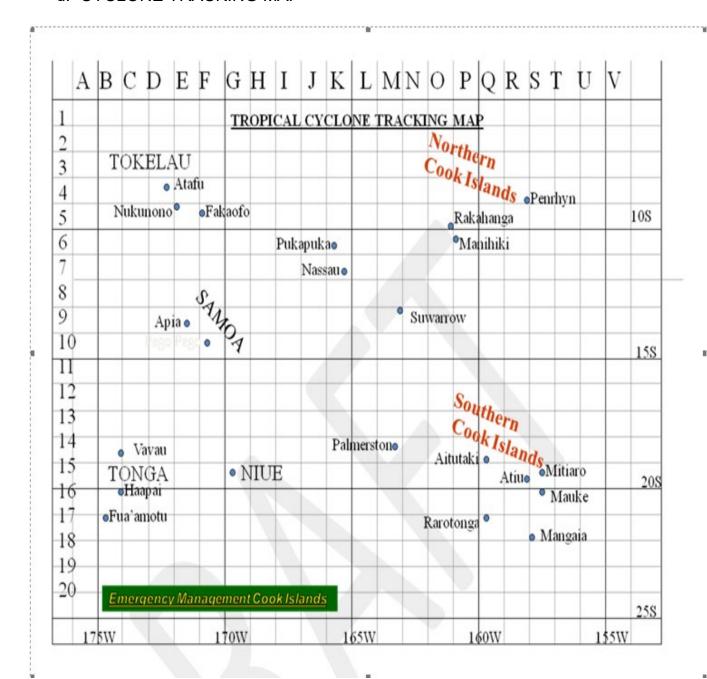

c. CYCLONE CATEGORIES

Cyclones are measured by category, from one to five depending on strength. One is the weakest end and five is extreme.

CATEGORY 1	Strongest winds are gales – typical gusts of 90-125 km/h. Possible damage to old traditional thatched buildings and poorly built houses and damage to some garden crops such as banana and fruit trees.
CATEGORY 2	Destructive winds – gusts of 125-164 km/h. Minor house damage and significant damage to signs, trees and local thatched houses. Damaged to food crops and fruit trees. Expected risk of power failure.
CATEGORY 3	VERY DESTRUCTIVE winds with gusts 165 - 224 km/h. Some local thatch houses destroyed and some roof and structural damage for permanent buildings. Power failures are likely. Possible minor damages to public utilities and infrastructures.
CATEGORY 4	VERY DESTRUCTIVE winds with gusts 225 - 279 km/h. Significant roofing loss and structural damage expected. Many thatch houses destroyed and blown away. Dangerous airborne debris. Widespread power failures expected.
CATEGORY 5	VERY DESTRUCTIVE winds with gusts of more than 280 km/h.

Aitutaki Island Disaster Risk M	lanagement Plan 2023 - 2025
	Extremely dangerous. Widespread destruction expected.
	Building, trees and public infrastructures are expected to be badly affected.

d. CYCLONE TRACKING MAP

ANNEX 2: TSUNAMI INFORMATION

A tsunami is caused several ways including an earthquake, a land slip, an underwater land slip, a volcanic eruption and a meteor hitting the ocean.

A tsunami wave is not a tidal wave and is not a singular wave but rather a wide and long wall of water hitting the coast at approximately 300 – 800 km/hr.

A large earthquake in the Kermadec trench off the coast of Tonga will be devastating for the entire pacific.

A tsunami in the Cook Islands could arrive within one hour of an earthquake. The Samoa Tsunami reached land 8 minutes after the first earthquake was recorded. The size and arrival time of the tsunami depends on the magnitude of the earthquake and where the epicenter is.

All communities located within a kilometer off the coast are at risk.

A tsunami can cause death or injury, damage infrastructure and destroy plantations in low lying areas. It can last for more than 24 hours.

BE AWARE OF THE SEA.

If you see something that you think is unusual, then it probably is. Respond immediately!

HAVE A FAMILY EVACUATION PLAN.

Discuss your tsunami plan with your family.

ACT ON YOUR PLAN.

Do not wait to be told what to do!

DO NOT TRY TO FIND ABSENT FAMILY OR BUDDIES.

Remember, under your family plan, you have agreed to meet at a pre-arranged, safe location.

HAVE A READY BAG THAT INCLUDES ESSENTIAL ITEMS ONLY.

A radio and torch (with batteries), personal medicines, anything of personal value (e.g., passport, family photos) etc. Keep your ready bag where you can easily find it when you evacuate.

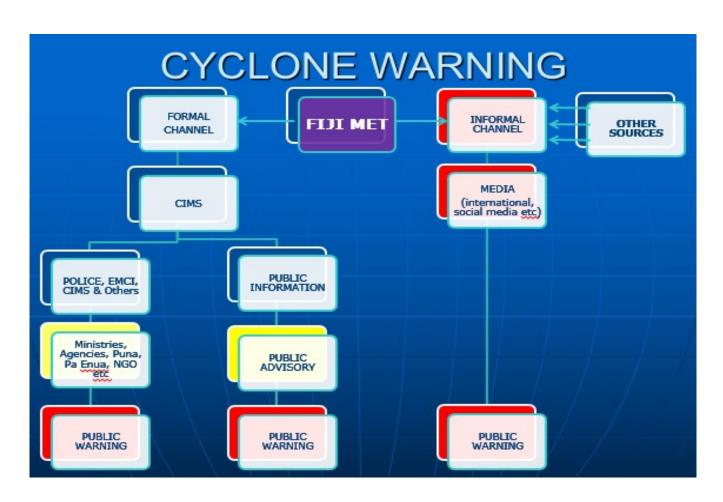

GO IMMEDIATELY INLAND TO YOUR PRE-ARRANGED, SAFE LOCATION.

Go to high ground immediately. Stay at least eight hours or until the authorities advise that it is safe to return home

ANNEX 3: EARLY WARNING

A Special Weather Bulletin is normally disseminated by the Cook Islands Metrological Services (CIMS) and this information is transmitted over radio, CITV, telephones, mobile, emails and our coconut wireless.

If any event is considered to be serious CIMS, POLICE, EMCI will discuss the situation and may call on or consult with other key stakeholders before making a decision concerning a national response. All response agencies including the Puna Coordinators will then be contacted of any actions that may be required to be implemented immediately.

ANNEX 4: BUSH FIRE

Hazard Assessments

Frequency: Between 6 -10 years

Severity: 1993- approximately 2/3 of the fern land including

planted trees were destroyed.

In 1979 this hazard threatened many plantations

Coastal fire occurs very often

Location: Coastal – No threat to people only environment and wild life.

Fern land – forest and plantations

Time Period: Fern land – 2 days or more

Coastal – nothing else to eat

Speed of On-set: Fast – weather pending...strong wind can speed up the travel of this hazard. Dry weather for the weeks prior can also leave fire favorable dry debris.

Vulnerability Assessment	
People	No communities located in the high risk areas.
Property:	Few plantations will be affected
Economy:	Timber production may decrease. Restoration of timber and other affected areas will incur extra costs to community and local government and eventually national government
Environment	Deforestation later increasing land erosion therefore increasing vulnerability to Island from other hazards such as cyclones and sea surge. Erosion threatening wild life
Society:	Local government becomes dependent on national government and international donors for assistance. Loss of income may also result in locals migrating to find work.
Potential Secondary Disasters:	
Disaster Coordinator to consider these-measures to alleviate impact of secondary disasters during a brush fire event.	
Community	Regular tree trimming program to alleviate this threat from rapidly spreading

ANNEX 5: DRM CYCLE

ANNEX 6: PA ENUA MAPS

ANNEX 7: SOP – WARNING SIREN

STANDARD OPERATING PROCEDURES - WARNING SIREN

Since 2010, all Outer Island (Pa Enua) communities including Rarotonga communities were issued with a carrel & carrel warning siren by the office of Emergency Management Cook Islands (EMCI). Communities were either issued a double ended siren, a single ended siren or a manual siren.

The Warning Siren is to be activated/ sounded at the decision of the Disaster Coordinator, after consulting the Disaster Risk Management Council of that Island.

Activating or sounding the warning siren is the final warning for the community to evacuate immediately, to a safer area or to their designated Safety Shelter/s.

The warning siren can be activated for any hazard that poses a threat to human lives, property and the environment. These hazards can either be a cyclone, tsunami, bush fire or any other hazard determined by the DRM Council and the Disaster Coordinator to be risk to their community.

SIREN ACTIVATION:

- 1. Siren switched on to sound a steady tone for three minutes
- 2. Siren switched off and rested for three minutes
- 3. Siren switched on again to sound a steady tone for three minutes
- 4. Sirens may sound until the Disaster Coordinator is satisfied with its warning of the public.
- 5. No all-clear siren will be sounded.
- 6. The Public should listen to radio and/or local media for current weather information or as advised by the Disaster Coordinators or members of the DRM members.

WHAT THE PUBLIC SHOULD DO, DURING SIREN ACTIVATION;

- 1. For Tsunami move immediately away from coastal areas or move to higher grounds or your designated safety shelters
- 2. For cyclones evacuate to safer buildings or to your designated safety shelters
- 3. Listen to your radio and/or the local media for current weather information and updates

SIREN TESTING & MAINTENANCE:

- 1. Sirens should be fully tested annually
- 2. Sirens will be activated for three minutes during testing
- 3. This includes full cleaning & maintenance of the siren with paint, grease or use CRC as required to ensure the moving parts of the siren can move freely.

Sirens Situated:

- 1. Tautu Community Hall
- 2. Nikaupara Hall
- 3. Vaipae Hall
